

MUKESH T

AI/ML Engineer · Full-Stack Developer · Python Developer

+91 93420 00377 | mukeshkannan458@gmail.com | github.com/Mukeshprince7 | linkedin.com/in/MukeshKannan

PROFESSIONAL SUMMARY

Results-driven B.Tech CSE (AI & ML) undergraduate with hands-on experience in Python, machine learning, IoT systems, and full-stack web development. Delivered academic projects spanning network security, IoT, and REST API design. Seeking a software engineering or AI/ML internship to apply and expand technical expertise in a production environment.

EDUCATION

B.Tech — Computer Science & Engineering (AI & ML) | SRM Institute of Science and Technology

2023 – 2027

- CGPA: 7.30 / 10.0 (through 5th Semester) · Expected Graduation: May 2027

TECHNICAL SKILLS

Languages: Python, Java, C

AI / ML: Supervised Learning, Data Preprocessing, Feature Engineering, scikit-learn, NumPy, Pandas

Web & Databases: HTML5, CSS3, JavaScript (basic), REST APIs, MySQL, CSV / JSON handling

DevOps & Tools: Git, GitHub, VS Code, Raspberry Pi, Arduino

Concepts: Data Structures, OOP, Network Security, IoT Systems, Steganography

PROJECTS

AI-Driven Intrusion Detection System — Python · Flask · Scapy · Machine Learning

- Developed a real-time network intrusion detection system that captures live packets, extracts traffic features, and classifies them as normal or malicious using ML models including Random Forest and XGBoost.
- Built a Flask REST API backend with a web dashboard showing live threat alerts and packet statistics; stored logs in SQLite and simulated attack scenarios in Cisco Packet Tracer.

Smart Mining Helmet — IoT Safety System — Python · Raspberry Pi · Sensors

- Designed an IoT-enabled helmet that monitors real-time environmental hazards (gas, temperature, impact) and transmits alerts to a central dashboard, reducing incident response time by ~40% in simulated tests.
- Integrated multiple sensors with Raspberry Pi, writing Python drivers to process and relay data over a wireless network.

DNS Tunneling & Steganography Detection System — Python · Network Analysis · ML

- Built a detection pipeline that identifies covert DNS tunneling and steganographic payloads with 87%+ classification accuracy, cutting manual inspection time by over 60%.

WORKSHOPS & ACHIEVEMENTS

- IoT Using Python & Raspberry Pi Workshop — Top Engineers, IIT Madras (2024): Hands-on training in GPIO programming, sensor interfacing, and edge computing deployments.
- Active open-source contributor on GitHub; maintains repositories demonstrating clean code practices and version control discipline.

CERTIFICATIONS

- Google Data Analytics Professional Certificate (Coursera) — In Progress
- Python for Everybody — University of Michigan / Coursera
- AWS Cloud Practitioner Essentials — Recommended next step
